In the Collection and Organization of the Museum the uterest care has been taken to gratify and enlighten the public by presenting in One Vast Assemblage an accumulation such as has never been attempted or dreamed of by the combined fact, talent and liberality of all other managers in America or Europe. It may be interesting for who are found in almost every part of the world, have been actively employed in proearing Curiosities for his Great Travelling Show. Some of these were put on exhibition for the First Time last year; but they have been very largely supplemented for the present season by New Accessions and Consignments brought by almost every steamer from Foreign Ports which has arrived in New York for the past Eight Months As an illustration of the Indomitable Energy of the well known proprietor of this establishment, it may be well to remark that the Exhaustless resources of Europe, Asia, Africa and America, with the subdivisions of Chiua, Japan, Australia, the Polar Regions, South Sea Islands, Arabia, Turkey, Siam, Circassia, Egypt, the Pacific, Arctic, Indian and Atlanic Oceans, together with the Red Sea and Hely Land, have all been levied into, contributing to swell the aggregate of this single department, which, after all, constitutes but a moiety of all that may be seen. It is estimated that in th Aqua-

rium, Museum, Menagerie and Caravan there are TWENTY THOUSAND CURIOSITIES. This Stupendous Combination has been brought together at an actual cost to the Pro-prieter of more than a Million of Dollars, which is ten times more than was ever inprieter of more than a Million of Dollars, which is ten times more than was ever invested in a single Show. The curiosities of the several departments represents the choicest excerpts from the realms of Zoology, Oraithology, Geology, Ichthyology, Conchology, Entomology, Anthropology, Machanics, Numismatics, Science, Statuary, Oil Paintings, and many large and exquisite productions of the Automatic and Heliographic Aris, and so chassified for this Great Exhibition as to challenge the admiration not only of Naturalists but of Pacts, Statesmen, Philosophers and Divines.

Parents, Sabbath and Public School Teachers should bear in mind that No Public Exhibition ever in-tituted in America afforded a lithe of the Practical Lessons of Institution which are found in this Unique Exposition of Object Teaching.

To this vast array is added, in a Separate Colossal Tent capable of helding Teal Thousand People.

With One Hundred Horses, Poules, Camels, Mules, Riding Dogs, Monkeye Trick Horses, Elephants, and Fifty of the Best Male and Female Artists in the World.

If travelling by wagons would require the actual services of nearly Two; Thousand Men and Horses, it is furthermore confidently believed by those most computent to judge, while the management are very emphatic in the statement, that taken in the aggregate, J. Eobit son's World's Fair has more real and solid attraction, merit and value, with a Greater Variety of Macveloux Peatures than is usually contained it Twenty Ordinary Shows,
In order that the Public may be able to form an approximate conception of the magni-ude of this concern, we volunteer the statement that—which will be qualified at any time—the daily expenses attending John Robinson's Exhibition are Three Lines

More than the Gross Receipts of any of the self-styled first-class shows in America. It is, therefore, with no ordinary degree of confidence that the management announces that these Twelve Great Shows for Only One Price of Admission are positively the Largest Ever Seen on Earth. We respectfully solicit the attention of the reader to the following commercation of only the Leading Features of the Great Exhibition, as we have not the space to mention the Multitudinous Curiosities with which the entire Exposition so amazingly abounds. The Monster Sea Lions srom Alaska, Nine in number, the largest weighing
